| Hurricane, flooding damage [but not over the top damage] | Here in New York [ALT: Long Island], we're on the front lines of climate change. | <p>Suffolk Times: “Long Island Could See ‘A Very Strong Increase’ In Flooding” Due To Climate Change. “A new study has predicted more frequent high tide flooding on U.S. coastlines in the mid-2030s, exacerbated by climate change-induced sea-level rise and tidal patterns influenced by the moon’s 18.6-year cycle. Based on this study, Stony Brook University professor Edmund Chang said Long Island could see ‘a very strong increase’ in flooding in the early 2040s.” [The Suffolk Times, 7/23/21]</p> <p>Newsday: “Long Island Is Already Suffering From Climate-Change Impacts.” “Long Island is already suffering from climate-change impacts. We have sea-level rise, an increase in the frequency of flooding of the mainland.” [Newsday, 8/14/21]</p> |

The future of our planet is at stake. Nothing is more important.” [Twitter, @RepKathleenRice, 4/22/19]</p> <p>May 5, 2016: Rice: “There’s No Time To Waste When It Comes To Combating Climate Change.” From a petition: “There’s no time to lose when it comes to combating climate change. President Obama’s Clean Power Plan is under attack at the Supreme Court – and the Justices’ decision in this case could have major implications for our planet’s future. We can’t afford to go backwards in the fight against climate change. Tell the Supreme Court to protect the Clean Power Plan by adding your name to our citizens amicus brief! Overturning the Clean Power Plan would not only undermine our efforts to reduce air and water pollution here at home – it would also jeopardize the future of the Paris Agreement, setting back the global fight against climate change.” [Kathleen Rice for Congress, 5/5/16]</p> |
